

General Aviation INSTRUMENT AIR FILTERS

Replacement Filter Application Information

Document Number P486322* Rev 1

GENERAL SERVICE GUIDELINES

Storage

When storing new air filters, be sure they are protected from dust and potential damage.

Recommended Service Schedule

Replace your air filter annually or 500 flight hours, whichever occurs first, and at each pump replacement. These instrument air filters are NOT cleanable.

Installation

1. Inspect the housing surface on which the filter seals. It must have a clean, smooth and flat surface.
2. If your filter contains a gasket, inspect the gasket for damage. If it is not smooth and flat, replace the gasket because the seal may not be air tight.
3. Install the filter. Be sure it is mounted securely and there are no dust leaks past the edge of the filter and gasket.

NOTE: This is a dry-type filter – DO NOT apply oil or clean the filter.
